

The Close KPI Catalogue

Every metric in the FSCP framework: eight domains, 56 close processes and 204 metrics. Each one measures something that can hold up a close, never a completion percentage, and each one carries the population it is measured against.

8 DOMAINS	56 CLOSE PROCESSES	204 KPI METRICS	R / O / G COLOUR LOGIC
--------------	-----------------------	--------------------	---------------------------

How to read a line

Domain and close process. Which of the eight domains a metric belongs to, and which close process inside it. The structure does not change between periods, so a metric means the same thing in March as it does in September.

The close blocker. What is being counted, always stated as a problem: pending, unmatched, unposted, breaching, missing or unapproved. Never a completion rate.

Measured against. The denominator. Value over total count gives the issue percentage, and your own thresholds turn that into a colour. Nothing else is entered, and the message writes itself: 14 of 140 pending.

The dashboard rule

Show only close blockers: pending, mismatch, difference, breach, missing reference or unresolved approval. Every metric declares whether there is a blocker, and how severe it is. A close status of 92% complete tells nobody what to do next.

The eight domains

CODE	DOMAIN	CLOSE PROCESSES	METRICS	WHAT IT PROTECTS
IC	Intercompany Finance	7	28	Eliminate intercompany billing, booking, settlement and confirmation blockers.
CF	Core Finance	5	28	Protect the core books: GL, AP, AR, fixed assets, bank and cash.
GA	GA Close	13	39	Drive period-end close activities from master data through to P&L review.
TF	Transaction Finance	4	20	Control transactional close flows across P2P, O2C, inventory and payroll.
RC	Reporting & Compliance	8	33	Finalise post-close reports, schedules, controls and the consolidation package.
FP	Financial Planning	8	24	Close budget, forecast and review cycles with approved management inputs.
PC	Planning & Control	3	15	Validate cost, profit-centre and FP&A control views before management close.
IR	Intelligence & Risk	8	17	Surface anomalies, recovery opportunities and audit-trail risks early.

IC

Intercompany Finance 7 close processes · 28 metrics

Eliminate intercompany billing, booking, settlement and confirmation blockers.

IC billing · measured against all intercompany invoices due in the period

- 1 Intercompany invoices not raised
- 2 Billing raised without a counterparty reference
- 3 Invoices raised after the billing cut-off
- 4 Billing value differing from the agreement

IC AP booking · measured against all intercompany invoices raised

- 1 Invoices not booked by the counterparty
- 2 Bookings with no matching billing document
- 3 Booking date outside the billing period
- 4 Intercompany bookings blocked for payment

IC settlement · measured against all open intercompany balances

- 1 Balances unsettled beyond policy
- 2 Settlements with no netting reference
- 3 Part-settled intercompany invoices open
- 4 Settlement value differences

IC cash application · measured against all intercompany receipts in the period

- 1 Intercompany receipts unapplied
- 2 Receipts applied against the wrong entity
- 3 Cash applied with no remittance reference
- 4 Intercompany receipts held in suspense

IC balance confirmation · measured against all counterparty entities in scope

- 1 Confirmations not received
- 2 Confirmations returned with differences
- 3 Confirmations unsigned by the counterparty
- 4 Confirmation differences unexplained

IC elimination readiness · measured against all intercompany pairs in the period

- 1 Intercompany pairs not matched for elimination
- 2 One-sided intercompany entries
- 3 Non-intercompany postings in IC accounts
- 4 Elimination differences above threshold

IC transfer pricing and recharges · measured against all intercompany transactions in the period

- 1 Transactions with no agreed markup
- 2 Markup applied outside the agreed range
- 3 Transfer pricing documentation missing for the period
- 4 Agreed recharges not raised

CF

Core Finance 5 close processes · 28 metrics

Protect the core books: GL, AP, AR, fixed assets, bank and cash.

General ledger · measured against all journals in the period

- 1 Journals unposted at close
- 2 Journals pending approval
- 3 Trial balance debit and credit difference
- 4 Journals posted into a closed period
- 5 Suspense account balances open
- 6 Manual journals above the review threshold

Accounts payable · measured against all open vendor items

- 1 Invoices blocked for payment
- 2 Invoices with no goods receipt
- 3 Invoices pending approval beyond SLA
- 4 Debit balances sitting in vendor accounts
- 5 GR/IR items open beyond ageing policy
- 6 Vendor advances unadjusted

Accounts receivable · measured against all open customer items

- 1 Receivables overdue beyond policy
- 2 Receipts unapplied against invoices
- 3 Credit balances sitting in customer accounts
- 4 Customer credit limits breached
- 5 Disputed invoices open
- 6 Bad debt provision not updated for the period

Fixed assets · measured against all assets in the register

- 1 Assets not capitalised from work in progress
- 2 Depreciation not run for the period
- 3 Assets with no location or custodian
- 4 Disposals not accounted
- 5 Asset register to GL difference

Bank and cash · measured against all bank and cash accounts

- 1 Reconciling items open beyond ageing policy
- 2 Bank accounts not reconciled for the period
- 3 Cheques issued and unpresented beyond validity
- 4 Cash on hand to book difference
- 5 Bank charges and interest not accounted

GA

GA Close 13 close processes · 39 metrics

Drive period-end close activities from master data through to P&L review.

Master data readiness · measured against all active master records

- 1 Inactive cost centres carrying balances
- 2 Blocked GL accounts with open items
- 3 Master data changes pending approval

Sub-ledger close · measured against all sub-ledgers in scope

- 1 Sub-ledgers not closed for the period
- 2 Sub-ledger to GL differences
- 3 Postings made after sub-ledger close

Accruals · measured against all known obligations in the period

- 1 Accruals not raised for known obligations
- 2 Prior-period accruals not reversed
- 3 Accrual value variance against actual

Provisions · measured against all provision accounts

- 1 Provisions not reviewed for the period
- 2 Provisions carrying no supporting basis
- 3 Provision releases without approval

Prepaid and deferred · measured against all prepaid and deferred schedules

- 1 Prepaid schedules not amortised
- 2 Deferred charges with no schedule
- 3 Fully amortised balances still open

Reclassifications · measured against all reclass entries in the period

- 1 Reclass entries pending
- 2 Reclass entries with no narration
- 3 Reclasses repeating across periods

Foreign exchange · measured against all open items in foreign currency

- 1 Revaluation not run for the period
- 2 Open items with no valid exchange rate
- 3 Exchange differences above threshold

Payroll accounting · measured against all payroll runs in the period

- 1 Payroll postings not reconciled to the register
- 2 Statutory deductions not deposited
- 3 Payroll suspense balances open

Tax accounting · measured against all tax GL accounts and returns

- 1 Tax ledger to return difference
- 2 Tax provisions not updated for the period
- 3 Withholding not deposited for the period

Inventory accounting · measured against all stock and GRIR balances

- 1 Stock ledger to GL difference
- 2 GRIR balances open beyond policy
- 3 Inventory provisions not posted

Cost of sales · measured against all revenue lines in the period

- 1 Cost of sales not matched to revenue recognised
- 2 Standard cost variances unabsorbed
- 3 Cost postings with no cost object

Close task management · measured against all tasks on the close calendar

- 1 Close tasks not started
- 2 Close tasks breaching their SLA
- 3 Close tasks completed with no evidence attached

P&L review · measured against all P&L lines under review

- 1 Lines with variance above threshold
- 2 Variance explanations not provided
- 3 Review sign-off pending

TF

Transaction Finance 4 close processes · 20 metrics

Control transactional close flows across P2P, O2C, inventory and payroll.

Procure to pay · measured against all purchase transactions in the period

- 1 Three-way match exceptions open
- 2 GR/IR items unmatched
- 3 Purchase orders open beyond the delivery date
- 4 Invoices with no valid purchase order
- 5 Duplicate invoice candidates open

Order to cash · measured against all sales transactions in the period

- 1 Unbilled revenue open
- 2 Billing blocks on delivered orders
- 3 Deliveries with no invoice raised
- 4 Credit notes pending approval
- 5 Sales orders open beyond the cycle

Inventory movement · measured against all stock movements in the period

- 1 Movements with no valid material to GL mapping
- 2 Backdated stock postings
- 3 Stock in transit beyond ageing policy
- 4 Quarantine and blocked stock unresolved
- 5 Physical count differences unposted

Payroll processing · measured against all payroll transactions in the period

- 1 Payroll runs not posted to finance
- 2 Payments to employees with no active record
- 3 Off-cycle payments without approval
- 4 Reimbursements pending beyond SLA
- 5 Payroll accrual not raised

RC

Reporting & Compliance 8 close processes · 33 metrics

Finalise post-close reports, schedules, controls and the consolidation package.

Financial statement preparation · measured against all statements and schedules due

- 1 Statements not prepared for the period
- 2 Supporting schedules pending
- 3 Notes to accounts incomplete
- 4 Prior period comparatives not restated

Consolidation · measured against all entities in the consolidation scope

- 1 Entities not submitted for consolidation
- 2 Elimination entries pending
- 3 Consolidation adjustments unapproved
- 4 Minority interest not computed

GAAP and standards adjustments · measured against all reporting adjustments due

- 1 Local to group GAAP entries pending
- 2 New standard adjustments not applied
- 3 Lease schedules not updated
- 4 Revenue recognition adjustments pending

Statutory reporting · measured against all filings due in the period

- 1 Filings pending for the period
- 2 Filings submitted after the due date
- 3 Supporting schedules not attached
- 4 Regulator queries open

Internal controls · measured against all controls in the period test plan

- 1 Control tests not performed
- 2 Controls failed and unremediated
- 3 Segregation of duties conflicts open
- 4 Control evidence not attached

Audit support · measured against all audit requests and observations

- 1 Audit requests open beyond SLA
- 2 Audit observations unremediated
- 3 Evidence packs incomplete
- 4 Prior year points carried forward

Disclosure and notes · measured against all disclosures required for the period

- 1 Related party disclosures incomplete
- 2 Contingent liabilities not updated
- 3 Commitments schedule pending
- 4 Subsequent events not reviewed

Sign-off and certification · measured against all entities and owners required to sign off

- 1 Entity sign-offs pending
- 2 Sign-offs recorded with no supporting evidence
- 3 Certifications submitted late
- 4 Sign-off exceptions unresolved
- 5 Close period not locked

FP

Financial Planning 8 close processes · 24 metrics

Close budget, forecast and review cycles with approved management inputs.

Budget preparation · measured against all budget lines in scope

- 1 Budget inputs not submitted
- 2 Budget lines with no owner
- 3 Submissions after the cut-off

Budget approval · measured against all budgets awaiting approval

- 1 Budgets pending approval
- 2 Approvals outside the delegation matrix
- 3 Approved budgets not uploaded

Forecasting · measured against all forecast lines in the cycle

- 1 Forecast not submitted for the period
- 2 Forecast lines unchanged from the prior cycle
- 3 Forecast horizon incomplete

Forecast accuracy · measured against all forecast lines with an actual

- 1 Forecast variance above threshold
- 2 Variance repeating across cycles
- 3 Accuracy commentary not provided

Budget against actual · measured against all cost centres with a budget

- 1 Cost centres overspent against budget
- 2 Variances with no explanation
- 3 Variance approvals pending

Margin analysis · measured against all products and services with a target margin

- 1 Lines below target margin
- 2 Margin declining against the prior period
- 3 Margin drivers not explained

Capital expenditure planning · measured against all approved capex items

- 1 Capex approved and unspent
- 2 Capex spent without approval
- 3 Capex milestones missed

Cash flow planning · measured against all cash forecast lines

- 1 Cash forecast variance above threshold
- 2 Funding gaps flagged and open
- 3 Working capital days above target

PC**Planning & Control** 3 close processes · 15 metrics

Validate cost, profit-centre and FP&A control views before management close.

Cost allocation · measured against all costs subject to allocation

- 1 Costs unallocated at period end
- 2 Allocation cycles not run
- 3 Allocation rules with no owner
- 4 Costs allocated to inactive objects
- 5 Allocation results not reviewed

Profit centre control · measured against all active profit centres

- 1 Profit centres in loss against plan
- 2 Profit centres with no responsible owner
- 3 Inter-profit-centre postings unmatched
- 4 Profit centre mapping errors
- 5 Segment results not reconciled to the P&L

Management reporting · measured against all reports and actions in the review pack

- 1 MIS packs not published
- 2 Actions from the prior review still open
- 3 Reports published with no reconciliation to the GL
- 4 KPI definitions changed without approval
- 5 Management review sign-off pending

IR**Intelligence & Risk** 8 close processes · 17 metrics

Surface anomalies, recovery opportunities and audit-trail risks early.

Anomaly detection · measured against all transactions scored in the period

- 1 Critical anomalies detected
- 2 Anomalies open beyond SLA

Duplicate and leakage detection · measured against all payments and claims in the period

- 1 Duplicate payment candidates open
- 2 Recovery opportunities identified and not actioned

Recovery tracking · measured against all recoveries raised

- 1 Recovery actions pending
- 2 Recoveries raised and not collected

Manual intervention · measured against all postings in the period

- 1 Manual journals to control accounts
- 2 Manual overrides of system-proposed values

Access and authorisation · measured against all users and master data changes

- 1 Postings by users outside their role
- 2 Unauthorised master data changes

Audit trail integrity · measured against all transactions in the period

- 1 Transactions with an incomplete audit trail
- 2 Backdated changes after sign-off

Fraud indicators · measured against all payments and vendor changes

- 1 Vendor bank detail changed before payment
- 2 Payments just below an approval threshold

Predictive close risk · measured against all domains and close tasks

- 1 Close tasks predicted to breach
- 2 Domains trending red against the prior close
- 3 Exceptions repeating across three closes

Where to go next

Thresholds are yours to set. The 204 questions are the same for everybody, which is what makes one close comparable to the next and one entity comparable to another.

Before adopting anything, we score a close you have already signed: all 204 metrics across the full population, not a sample, showing what was blocking that close and what it was worth. Nothing changes in your systems, and it happens before there is anything to sign.
